OUTDOOR WOOD BOILERS UNDERWRITING GUIDELINES AND QUESTIONNAIRE

The Wood Boiler must fulfill the following requirements:

1. Be attached to a centralized heating system (duct work or hot water baseboard systems) that distributes the heat through the entire home
2. Have a firebox large enough to sustain the heat for more than 24 hours.
3. Be professionally installed. Name of Installer: _____
4. Be UL or other approved manufactured furnace.
5. Be a minimum of 25 feet from the nearest structure (unless built since 2015 with a **photo of the UL plate** stating that the installation clearances to combustibles are 18 inches from the back, 48 inches from the front, 6 inches from the sides, and 18 inches from the chimney connector)
6. Be a free-standing unit (unless manufacturers' guidelines state otherwise with copy of proof provided)
7. Designed for burning wood (pellets, garbage, old tires etc. are not recommended)

If the wood boiler meets the criteria above and if the installer's name is filled in, please sign below.

Any person who knowingly and with intent to defraud any insurance company or other person files an application for insurance or statement of claim containing any materially false information, or conceals for the purpose of misleading, information concerning any fact material hereto, commits a fraudulent insurance act, which is a crime, and shall also be subject to a civil penalty not to exceed five thousand dollars and the stated value of the claim for each such violation.
